To Whom It May Concern,

### **Recommendation letter**

We are writing to express our satisfaction with services provided by APEC Training Center LLP (APEC). We have initially started working with APEC in August 2018 by sending our employees for Health and Safety trainings. KCOI LLP has been also aware of APEC's Craft Assessment and Training development works. Observing their progress in this area, and getting feedback from their clients, built our confidence in the quality of their Craft training.

Highly skilled people are the precious asset for KCOI company. Therefore, we do utmost to recruit talented people and provide dedicated training to further improve their skills.

Taking part in "Zhana Serpin" Program, Unemployed Youth Skills Development program, of Mangystau Oblast KCOI have launched a project on training 20 pipefitters at APEC to develop their abilities and qualification, to allow them to enter the local job market. KCOI has chosen APEC as it has proven itself as one of the best training centres in the region, fully complying with international standards and having strict demands and objectives to prepare the best workers in various crafts.

We are looking forward to seeing results of the first group, and in the future needs very keen to send next one for training in other highly demanded disciplines.

APEC maintains clear communication with KCOI on learners' progress to give us ability to interact whenever we feel necessary. Our Representatives are always welcome to attend assessment and training sessions. APEC readily discusses programs structure and content to make sure training is fit for purpose.

Should you require more details please do not hesitate to contact us.

Best regards,

  
**Aldiyarov Rustem**  
**Branch Director of «KCOI» LLP in Atyrau**
